House and land packages at Springdale Beach
18/09/09

House and land packages starting at just \$497,000 and titled homesites priced from \$199,000 are now available at Springdale Beach at Denmark.

This stunningly located development offers unrestricted access to one of Denmark's safest swimming beaches and views across Wilson Inlet and to the hinterland.

The large homesites range in size from 3,000m² to 10,000m² and have been developed to appeal to purchasers who value the Denmark lifestyle, according to sales consultant Ondy Roach.

"Springdale Beach has been designed to appeal to people who love the laid-back Denmark atmosphere," Ondy said.

"With the beach on your doorstep and Denmark town site just 2.5km away, this is a rare opportunity to secure a homesite within a development that will set a benchmark for design in the area."

Plans for the development include a display home precinct featuring house designs from JCP Modular and Ross Squire Homes. The JCP Modular home is due to be completed in November, while the Ross Squire Homes will be opening early next year.

"Springdale Beach is in an outstanding location, and as the developers we believe we have risen to the challenge of delivering a development that reflects and protects the unique qualities of the landscape," LWP Property Group General Manager Peter Gleeson said.

For further information about homesites or house and land packages at Springdale Beach, contact Ondy Roach on 9848 2714.
